Professional Summary

B.Tech Information Technology student at CHARUSAT with experience in Software Development, AI Systems, Open Source, and Data Analytics. Built real-world solutions including an AI-powered ESG Fraud Detection Platform, a Hotel Self-Service Kiosk for a US-based hospitality client, and developer automation tools. Strong foundation in React Native, FastAPI, Python, system design, and problem-solving through hackathons and open-source contributions.

Education

Charotar University of Science & Technology (CHARUSAT)

Jul 2024 – May 2028

B.Tech in Information Technology

CGPA: 7.80/10

Technical Skills

Languages: Python, Java, C++, JavaScript, TypeScript, SQL

Frontend: React, React Native, HTML, CSS, Vite

Backend: Flask, FastAPI, REST APIs

Databases: MySQL, SQL

AI/ML: NLP (spaCy), scikit-learn, Classification, Anomaly Detection, PDF Processing

Analytics / BI: Pandas, NumPy, Power BI, Excel

Tools: Git, GitHub, Postman, Expo

Projects

Hotel Self-Service Kiosk – React Native, TypeScript, Expo

- Developing a self-service kiosk solution for a US-based hospitality client to streamline guest operations and improve customer experience
- Implemented digital workflows for check-in, check-out, visitor management, room extensions, and guest support services
- Designed tablet-first responsive interfaces optimized for kiosk environments and hospitality automation
- Built scalable frontend architecture using reusable React Native components and TypeScript

EcoShieldAI – AI-Powered ESG Fraud Detection System

- Developed an AI-powered ESG fraud detection platform for analyzing sustainability reports and identifying greenwashing indicators
- Built PDF extraction pipelines, ESG metric validation workflows, and fraud-risk scoring mechanisms using AI-assisted analysis
- Developed a React + FastAPI dashboard for real-time ESG assessment and sustainability risk visualization

Experience

Data Analytics Intern – 3Skill Intern Growth

Dec 2025 – Feb 2026

- Built Python and SQL pipelines processing 10,000+ records and improving data quality by 25%
- Designed Power BI dashboards reducing reporting effort by 30%
- Automated ETL workflows for efficient data processing

Research Publication

IoT-Driven RFID-Based Real-Time Attendance System

10th International Conference on Smart Trends in Computing and Communications (SmartCom 2026), Springer Nature

- Co-authored and presented research paper at SmartCom 2026 under the guidance of Dr. Aneri Pandya and Dr. Killol Pandya
- Designed and developed an IoT-enabled attendance system using ESP32 and RFID (RC522) for secure real-time authentication
- Implemented automated cloud synchronization using Google Sheets API for centralized attendance management
- Reduced proxy attendance and manual intervention through hardware-software integration and real-time validation workflows
- Focused on scalable and cost-effective deployment for smart campus environments

Achievements

- Rank 12 out of 188 Teams (Top 20) – GDG Open Source Hackathon Tech Sprint; merged 8 Pull Requests into real-world repositories
- Smart India Hackathon 2025 – Top 50 Team
- SSIP 2025 Phase-2 Selected for AI-based Educational Content Generation Project
- Gold League Achiever – Gen AI Academy 2.0
- Hacktoberfest Open Source Contributor

Leadership & Activities

Technical Member – CP Squad, CSPIT

- Organized 3 technical workshops on Git, GitHub, and development workflows
- Coordinated 2 hackathons promoting collaborative problem-solving
- Mentored 100+ students in coding and open-source contribution

Certifications

NPTEL: Programming in Modern C++, Data Structures Using Java, Joy of Computing Using Python (Elite + Silver)

Microsoft Applied Skills: Get Started Developing Agents in Microsoft Foundry

AWS Cloud Foundations — Coursera Java Programming — IBM JavaScript Essentials
